

SUMMARY

ML/AI Engineer with 6+ years turning messy real-world data into production systems that move metrics. Proven in healthcare (–13% insurance denials, LifeMD) and fintech (99.6% anti-fraud efficiency, Sber). Deep expertise in data analysis, NLP, and Generative AI. I build things that work at scale — and stay working.

SUMMARY

Data Analyst with a strong foundation in data engineering, machine learning, and advanced analytics (6+ years of experience). Proven track record of transforming complex raw data into actionable business insights, robust dashboards, and production-ready systems. Expert in SQL, Python, and BI tools (Power BI), combining deep technical execution with a solid background in business finance.

EXPERIENCE

ML Engineer | LifeMD | Remote | 2023–Present

- Designed automated ETL pipelines (PySpark, Airflow) to process, clean, and normalize raw EHR data into a unified format for deep medical and business analysis.
- Integrated structured and unstructured data sources to build predictive models and extract critical operational insights, reducing insurance denial rates by 13%.
- Implemented data governance processes: documented data sources, ensured data quality, and maintained data lineage for critical reporting pipelines.

ML Engineer | Sber | Moscow | Remote | 2020–2023

- Developed scalable ETL pipelines (Spark, Airflow, SQL, Grafana) and automated data quality monitoring.
- Built financial risk and anti-fraud models (XGBoost, Logistic Regression), turning complex transaction data into clear analytical reports and risk matrices.
- Collaborated closely with cross-functional business teams to translate requirements into precise analytical solutions.

Business Analyst & Finance Leadership | Telemarket MD · Cane Factory | Moldova | 2004–2019

Progressed from accountant to Financial Director; led data-driven financial reporting, cost modeling, and business analysis across manufacturing and commercial operations. Built the quantitative foundation for translating business needs into structured data insights.

PROJECTS

- Linda: HMM forex scanner with live business dashboard (Python, SQLite, Flask, Power BI) featuring automated data validation, quality monitoring, and performance visualization.
- ML Project Template & Analytics Pipeline: Production-ready data processing workflows (FastAPI, Pandas, SQLAlchemy, SQL).
- AI HR-Recruiter: CV-job matching system using NLP and data scraping (Python, TF-IDF).

EDUCATION

- Stanford University CS336: Advanced Language Models | 2024 - audit, in progress
- Skillbox Deep Learning | 2024 (ongoing), Machine Learning Engineer | 2021–2024
- Moscow State Technical University (BMSTU), MSc in Mathematics & Statistics | 2000–2004
- Agrarian University of Moldova, BSc in Economics | 1995–1999

SKILLS

• Data Analysis & BI: SQL, Advanced Excel (Pivot Tables, complex formulas), Power BI, Tableau equivalents, Matplotlib, Seaborn, ad-hoc analysis, data cleaning & preprocessing.

- *Programming & Data Processing: Python, Pandas, NumPy, PySpark, Airflow, ETL/ELT pipelines, FastAPI, SQLAlchemy.*
- *Data Governance & Quality: Data lineage, metadata management, data cataloging, monitoring, data integrity assurance.*
- *Databases & Tools: PostgreSQL, SQLite, Git, Grafana, Docker.*
- *Soft Skills: Cross-functional collaboration, translating business needs into insights, technical communication, problem-solving.*
- *Languages: Romanian (B2), Russian (native), English (B2), Turkish (B2).*
